GIA GIA Gemological Report

Ruby Origin Report

GIA Report 6237825556

January 15, 2026

Image is not to scale. Color is approximate.

Ruby

Ruby is the red variety of the mineral corundum. The name comes from the Latin word for red, ruber. Early cultures valued ruby because its color is similar to blood, leading to the belief that it held the power of life. The most famous source of ruby is Myanmar (formerly Burma), but other significant sources include Mozambique, Vietnam, and Thailand.

Characteristics

Mineral	Mohs Hardness	Toughness	Birthstone
Corundum	9	Excellent	July

Details

Item Description
One loose stone

Weight
2.40 carats

Measurements
8.52 x 6.15 x 4.59 mm

Shape
Cushion

Color
Red

Transparency
Transparent

Cutting Style: Crown
Brilliant Cut

Cutting Style: Pavilion
Step Cut

Results

Species
Natural Corundum

Variety
Ruby

Geographic Origin
Mozambique

Additional Results
Heated

Comments

Any statement on geographic origin is an expert opinion based on a collection of observations and analytical data.

FACSIMILE This is a digital representation of the original GIA Report. This representation might not be accepted in lieu of the original GIA Report in certain circumstances. The original GIA Report includes certain security features which are not reproducible on this facsimile.

THE SECURITY FEATURES IN THIS DOCUMENT, INCLUDING THE HOLOGRAM, QR CODE AND MICROPRINT LINES, IN ADDITION TO THOSE NOT LISTED, EXCEED DOCUMENT SECURITY INDUSTRY GUIDELINES.
